

FAC - Arcadia Traffic Pattern Map

***New this year is an outbound scale to the north of the big hoop. Like the past couple years, we will use the north road for inbound grain. Once grain is dumped, outbound traffic will be directed to the new road east of the anhydrous storage tanks. Follow this road around the new feed mill and pull on the north scale facing west. Once weighed, your ticket will be printed out on a kiosk. Please grab your ticket and proceed down the road to the west. This new addition of another scale to the north will help with the bottle neck we always had by the main office. The main office scale will now just serve as a back-up should any problems arise on the north scales.
